5/5 answered

Q1 Exception

10 marks

Write a Java program to store five integers in an array. Accept an index from the user and display the corresponding element. Handle invalid index access.

Test Case

Input

Array: 10 20 30 40 50

Enter Index:

6

Output

Exception: Invalid array index.

Your Code

```
1 import java.util.Scanner;
2 public class Main {
3     public static void main(String[] args)
4     {
5         int[] array = {10, 20, 30, 40, 50};
6         Scanner sc = new Scanner(System.in);
7         int index = sc.nextInt();
8         try {
9             System.out.println(array[index]);
10        } catch (ArrayIndexOutOfBoundsException e) {
11            System.out.println("Exception: Invalid array index.");
12        }
13    }
14 }
```

14 }

Input

4

Output

50
